25 AUG 1965

Mr. Andrew E. Ruddsck, Director Bureau of Retirement and Insurance United States Civil Service Commission Vachington, D. G. 20415

## Dear Mr. Ruddocki

This letter sets forth proposed changes in premium rates which we desire to make in our Association Benefit Plan for the coming contract year. In addition, we will specify the specific changes in benefits for which your approval is requested. In this connection, we reported in our letter of 21 June 1965 a series of benefits changes which our Board of Directors was considering. The series of benefits changes which our Board of Directors was considering. The final decision could not be made at that time since we were still waiting for final decision could not be made at the premium charge for the proposed information from the underwriter on the premium charge for the proposed benefits. For this reason, our sacitor letter recorded our request for several benefit changes and noted that a final decision would be made later.

At its meeting on 20 August 1965, our Board of Directors authorized me to request the following benefit changes in our high option Association Benefit Plans

- a. An increase in the hospital miscellaneous benefits from \$202,50 plus 80% of the agent \$5,000 for 90 days to payment in full for 90 days for any one period of hospital confinement.
- b. As addition to the contract providing an incidental X-ray and laboratory expense benefit of \$75 for each calendar year
- C. An ingreese in the manimum major medical benefit from \$20,000 to \$10,000.
- d. An increase in the meterally benefits from the present limits of Side day for up to 8 days to \$20 a day with a maximum of 8 days.

Places note that the proposed benefits Reted above were set forth in paragraph 2 b. c. c. and f of our letter of 21 June 1965.

Further, our Board has authorized me to request appreval for an additional 1% administrative expense allowance over and above the 1% allowance currently in effect. The total 2% administrative allowance would apply to both our low and high option Association Benefit Plan.

We have been informed by our underwriter that the total charge for the sensitis specified above would require an additional \$.71 bi-weakly for the high option single option family plan and an additional \$.25 bi-weakly for the high option single plan. Based on our calculations, the cost of the proposed benefits and the 2% administrative allowance, if the additional 1% allowance is approved, would semilistrative allowance, if the additional 1% allowance is approved, would result in a brochure rate for the high option bi-weekly family plan of \$6.25 and for the high option single plan, \$2.02.

Please note further that our underwriter has informed us that it is seeking no increase in premium.

We have looked very carefully at the degree to which our high option plan might be improved by the addition of the benefits specified above and are quite confident that these benefits will add significantly to the hospitalization protection afforded our subscribers. We strongly request, therefore, that approval be granted for these proposed benefits as well as for the additional 1% administrative expense allowance.

We are available for discussion of our proposed changes with representatives of your office as you may feel necessary.

Very truly your
